PROFESSIONAL SUMMARY

Entry-level IT support professional with a B.S. in Computer Science and hands-on experience configuring, upgrading, troubleshooting, and validating Windows laptops and desktops. Skilled in Windows 10/11, Active Directory fundamentals, Microsoft 365, hardware/software support, networking diagnostics, and technical documentation. Brings high-volume customer service experience, structured troubleshooting, and a strong foundation for help desk and desktop support environments.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Windows Server, Ubuntu Linux, macOS

IT Support: Hardware/Software Troubleshooting, Desktop/Laptop Support, Workstation Setup, Printer/Peripheral Support

Administration: Active Directory, User/Group Management, Password Resets, NTFS/Share Permissions

Networking: DNS, IP Configuration, Ping, NAT, Network Connectivity Troubleshooting

Tools: Microsoft 365, Outlook, Teams, OneDrive, Jira, VirtualBox, UTM

Programming: Python, SQL, JavaScript, TypeScript, HTML/CSS

PROJECTS

Windows Help Desk Lab - Windows Server, Windows 11, UTM

- Built a Windows support lab demonstrating desktop administration by configuring Windows Server and Windows 11 virtual machines.
- Administered user access by configuring Active Directory users, groups, password resets, mapped drives, and NTFS/share permissions.
- Resolved simulated Windows issues using Event Viewer, Device Manager, Task Manager, Command Prompt, ping, ipconfig, and DNS diagnostics.

Virtualized IT Support Homelab - Ubuntu, UTM

- Built a multi-VM Ubuntu environment demonstrating network administration through NAT, host-only networking, static IPs, and SSH access.
- Secured Linux systems by configuring UFW, fail2ban, unattended updates, Samba shares, and user/group permissions.
- Documented resolutions for connectivity, permissions, firewall, service-status, and file-access issues to create reusable troubleshooting references.

SkillBase Learning Management System - Senior Capstone Project

- Delivered 20+ functional requirements with a four-person team by developing, debugging, and testing a database-backed learning management system.
- Supported application reliability by debugging and testing multi-page functionality using TypeScript, Next.js, React, and database-backed features.
- Tracked bugs, tasks, and feature progress through Jira and team documentation across the software development lifecycle.

WORK EXPERIENCE

PcBase USA - Computer Technician

Irvine, CA | June 2026 - Present

- Configured laptops and desktops to customer specifications, verifying hardware and Windows requirements to ensure accurate order fulfillment.
- Diagnosed basic hardware and software issues, completed component upgrades and Windows preparation, and verified systems before final handoff.
- Reconciled assigned systems with invoices and internal procedures to maintain accurate inventory and customer-specific configurations.
- Escalated configuration issues to teammates and performed final system checks to support quality control before handoff.

UNIQLO - Retail Sales Associate

Costa Mesa, CA | September 2025 - June 2026

- Resolved product, checkout, return, and fitting-room questions for 100+ customers per shift in high-volume retail.
- Processed POS transactions and addressed basic checkout issues, keeping customers informed during service delays.
- Prioritized concurrent customer and team requests, followed procedures, and escalated complex issues to maintain efficient service.

EDUCATION

California State University, Fullerton

Bachelor of Science in Computer Science, Minor in Mathematics

GPA: 3.82 | Dean's List | Magna Cum Laude | Graduated January 2025

Relevant Coursework: Operating System Concepts, Computer Communications, Cybersecurity Foundations, Computer Organization, File Structures & Databases
